1. This is a first Office action on the merits for application serial number 10/615739 filed 07/08/03. Claims 1-16 are pending
2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.
4. The disclosure is objected to because of the following informalities: there is no brief description of figures 4A and 4B. There is no Figure 4 found.

Appropriate correction is required.
5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the helical strands must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

Art Unit: 3635

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-3, 5, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 2,533,402 to Schmitz.

See the screen of figure 4 and its description.

Art Unit: 3635

8. Claims 1, 2, 4, 6, 8 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,969,999 to Riddell.

See the screen of Figure 1 and its description.

9. Claims 1-3, 5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,107,635 to Carpenter.

See screen 38.

10. Claims 1-3 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,242,591 to Beechert et al.

See the screen of Figure 1 and its description.

11. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 3,507,396 to Homa.

See figure 1.

12. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

13. Claims 4-14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 5,242,591 to Beechert et al.

The material and dimensions of the screen as well as the particular mesh structure are viewed as choices of design which would have been obvious at the time of the invention to one having ordinary skill in the art as Beechert suggests a variety of materials may be used, that the strands may be joined in a variety of ways and that the screen and mesh may be dimensioned in a variety of sizes to meet specific requirements.

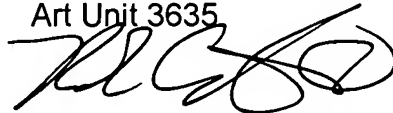

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J Canfield whose telephone number is 703-308-2482. The examiner can normally be reached on M-Th.
